Wood is a great ally of cozy lighting. It is a material that is hard to mold, a challenge that the Ginger collection neatly resolves.

The combination of sheets of wood and paper pressed together under high pressure achieves a laminate that appears almost entirely flat.

Pressed wood diffuser of 4 mm in natural oak or wenge. Injected aluminum dissipater, metal stem and base in lacquered black matte. Movable arm made of carbon fiber, lacquered in black matte.

Range

With an original system to orient and suspend it, the Ginger lampshade hangs from a structure that replaces the ceiling. The system allows the lamp to slide forward and backward and to be folded to either size. The carbon fiber arm has two possible movements depending on the pre-established position of the pivot joint. It is altogether striking, spectacular yet contained. It comes in two sizes to fit the needs of different spaces.
