Description

The Serien Lighting Club Floor floor lamp emits light into the room through its lamp shade. Three LEDs are integrated as illuminants, of which the two lower ones also emit their light downwards as reading light. The upper LED also directs its light upwards. The three LEDs can be switched and dimmed separately via push button dimmers on the lamp shade, so that the downward and upward light can be individually combined or used separately.

The unused cable can be coiled up in the base of the lamp. The frame is available either in brushed aluminum or lacquered black. The shade is made of white chintz cotton. The floor lamp is operated with three integrated LEDs, each with a colour temperature of 2,700 Kelvin extra warm white.
