Dimensions H 40 cm | Ø 140 cm

Description

The Luceplan Blow is a lighted ceiling fan. The ceiling fan can also be regulated with an optional remote control in light intensity and speed. It can also be regulated by the customer using a push-dimming system, for which a 5-core mains supply cable is required. There are available different rotors: in transparent, colour mix (blue, orange and green) or in transparent screenprinted. A switch for reversing the movement of rotors is also installed in the ceiling lamp. The design was developed by Ferdi Giardini in 1997.
