### Description

The Licht im Raum Spot 1 Zoom round has a lens that is not only traversable, but can also be zoomed in and out. The angle of radiation can thus be varied between 30 and 60°. A smaller value for the beam angle makes the light cone narrower, a larger value makes it wider. The light is bundled through the glass lens and directed to the desired location.

The spotlight can be used as ceiling or wall light. The bracket for ceiling or wall has a round shape. The light made of stainless steel is available in two surfaces.
