Description

Through the reflector of the Serien Lighting Drum Ceiling M Long, the light is directed downwards and softly diffused all around. Overall, the lamp is 29 cm high and has a diameter of 22 cm at the widest point. The Drum Ceiling M Long is available with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. With the Dim to warm function, the dimming behaviour of classic incandescent lamps that is perceived as pleasant is achieved during dimming. When dimmed down, the light not only becomes darker but also changes its colour temperature. The colour temperature changes continuously from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white.
