Description

The emitted light of the Serien Lighting Curling Wall Acryl clear S creates a light effect around the lamp on the wall. This wall lamp is 9 cm deep and has a diameter of 16 cm. The Curling Wall Acryl clear S is available with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. In the version with dim to warm function, the dimming behaviour of classic incandescent lamps, which is perceived as pleasant, is imitated during dimming. As a result, the light not only becomes darker when dimmed down, but also changes its colour temperature. The colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white. Besides this lamp, Serien Ligthing also offers the Curling Wall Acryl clear M with a diameter of 22 cm.
