

Bover

Lineana V-brown

Technical details

Country of Manufacture	 Spain
Manufacturer	Bover
Designer	Christophe Mathieu
Year of design	2010
Protection class / IP rating	IP66
Contents of the package	Leuchtmittel/ Bulb
voltage suitability	110 - 240 Volt
Depth in cm	10
material	aluminum, polycarbonate, stainless Steel
surface	brown
dimming	dimmable on site
Base / Socket	G9
Version	-
system performance	2 x 9 Watt (max.)
light distribution	indirectly
Dimensions	H 38 cm L 21 cm

Description

The Lineana V wall lamp was created by the designer Christophe Mathieu and is manufactured by the Spanish manufacturer Bover. The metal strips running across the lamp ensure that the light is emitted upwards, downwards and to the sides and front. Thanks to the use of IP66 protection class, this wall lamp is weatherproof and protected not only against splashing water but also against water jets and UV radiation. The Bover Lineana V wall lamp is provided with additional protection against oxidation in epoxy polyester and is available in graphite brown or graphite grey. The wall-mounted part of the rectangular Lineana V is 37.6 cm high, 14 cm wide and 10 cm deep. The length of the metal slats running along the front is 21 cm. The on-site dimmable lamp has two G9 sockets, the lamps are replaceable.
