Jules Verne Battery Light JU-Y

Leuchtenkopf

- glossy white
- matt white
- glossy black
- black matt
- polished aluminum

Technical details

Country of Manufacture	 Germany
Manufacturer	less'n'more
Designer	less'n'more
Year of design	2019
protection	IP43
Scope of delivery	LED
voltage suitability	110 - 240 Volt
material	aluminum, glass, leather, wood
beam angle	25 - 100 degrees
height adjustment	height adjustable
dimming	Push button dimmer on lamp head
Wattage	4.8 W
LED	inclusive
Colour Rendering Index	90
Luminous flux in lm	600
Color temperature in Kelvin	2,700 extra warm white
lamp stand dimensions	length 27, width 22 cm
light head dimensions	9 cm
bulb exchange	on site itself
Dimensions	H 85 - 135 cm

Description

The Less'n'more Jules Verne Battery Light JU-Y is a cordless floor lamp with a rechargeable battery. It can be recharged via the USB cable supplied. The battery lasts for at least eight and a half hours. The lamp base made of solid oak wood is ideal for carrying books, for example. The lamp head of the Jules Verne floor lamp is made of aluminum and can be positioned as desired. It can be rotated by 360 degrees and tilted by 135 degrees. The lamp can be adjusted in height from 85 cm to 135 cm by adjusting the lamp rod. A leather loop on the lamp rod is used for easy height adjustment. A push button is integrated at the lamp head with which the lamp can be switched and dimmed.

The lamp head in glossy black is made of aluminum. The lamp rod is always in aluminum. The beam angle of the light can be adjusted between 25 and 100 degrees, for this it is only necessary to turn the glass lens out of or into the lamp head. With a larger beam angle, the light is distributed over a larger area. The heat generated when the lamp is switched on is optimally dissipated by the head, so the beam angle of the light can be adjusted at any time. The integrated light source is an LED with a colour temperature of 2,700 Kelvin extra warm white.
