### Description

The Loom Design Ray Spot Small can be mounted on the ceiling or wall. Its spotlight lamp head can be rotated by 355 degrees and swivelled by 90 degrees. The lamp is 9 cm high and has a diameter of 9.3 cm. At maximum orientation of the lamp head, the spotlight is 15 cm high in total. The Ray Spot Small is offered in the surfaces white or black. The integrated LED has a colour temperature of 2,700 Kelvin extra warm white and a beam angle of 36 degrees. The lamp can be dimmed on site. An optical lens focuses the emitted light so that it is directed exactly where it is needed. A honeycomb grid is offered as an accessory, which glare-reduces and softens the emitted light. Loom Design also offers the larger Ray Spot Large spotlight from the series. On request, the lamp is also available for a ceiling track.
