Description

This Mawa Glaskugelleuchte LED has a white opal glass with a diameter of 30 cm. The light is distributed homogeneously in all directions through the glass. Each glass consists of three layers and is mouth-blown as well as elaborately handmade from opal glass. Possible small bubbles or slight deviations in size and glass thickness are signs of handcrafted quality.

The Glaskugelleuchte LED is available with an aluminum mounting in white matt, black matt and grey-metallic. The canopy is always supplied in the same colour as the mounting. The integrated LED can be dimmed by the customer with a leading edge or trailing edge phase dimmer. The lamp is offered with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or 4,000 Kelvin white.

The pendant lamp is delivered with a beam angle of 38 degrees. The cable is a maximum of 250 cm long and can be shortened if necessary.
