

Serien Lighting

Poppy Spare Bimetallic Lamellae

Technical details

Country of Manufacture	 Germany
Manufacturer	Serien Lighting
material	bimetal
Dimensions	L 12 cm

Description

The Serien Lighting Poppy replacement bimetal lamellae can be used for all lamps from the Poppy family. This replacement part has the shape of a metal flower. After switching on the light, the metal flower opens due to the heat of the light bulb. The lamellae can be replaced without tools.
