Germany Domus Stefan Wehrmann 2009 IP20 Leuchtmittel/ Bulb 110 - 240 Volt 18 Lunopal, Textile, wood dimmable on site E27 75 Watt white H 30 cm | B 16 cm

Description

A single strip of Lunopal, intertwined twice, creates an airy, light structure. Open at the bottom and top, the lamp casts a charming play of light and shadow on the wall. Lunopal is a high-quality shade material developed by Domus. This material is thermally highly resilient and can withstand temperatures of up to 100°C. Lunopal is white transparent and gives the impression of fine Japanese paper. The environmentally friendly material is UV-resistant, washable and does not yellow. The real wood wall bracket of the Domus Julii is optionally available in beech, maron-oil or white lacquer. This lamp is 30 cm high, 16 cm wide and has a projection of 18 cm. This wall lamp has an E27 socket and can be operated with conventional halogen bulbs as well as with LED retrofit bulbs.
