Description

The Betec Angulus has a lamp head that can be rotated around its own axis. This allows it to be realigned as needed to illuminate and highlight an image without glare. This makes the lamp ideal for illuminating pictures, menus and music stands. Here, the picture light is offered with an angled shape. It is 50 cm long and has a projection of 20 cm (bracket type 20). A Duo LED is integrated as the light source. A Duo LED consists of two LEDs in one housing and therefore has a particularly high light output.

The Betec Angulus 50 cm is available in the surfaces brass glossy, brass matt, chrome, nickel glossy, nickel matt, burnished, black matt, gold glossy and gold matt. The scope of delivery includes a mounting set with which the lamp can be easily attached directly to a picture or to the wall. The picture light has a colour temperature of 2,700 Kelvin extra warm white as standard. On request, it is also available with 2,400 Kelvin extra warm white, 3,000 Kelvin warm white or 3,100 Kelvin white. The integrated LED is characterised by very good colour rendering with a high colour rendering index of Ra >90. A touch dimmer is offered as an accessory, with which the lamp can be switched and dimmed by touch. The Angelus is also offered in three other lengths and with a projection of 15 cm or 25 cm.
