Description

The lamp shades of the Serien Lighting Twin LED are adjusted by pulling the lamp arms apart or pushing them together. If the distance of the lamp shades to each other is changed, the total height of the lamp can also be adjusted. The position of the two lamp shades always remains horizontal to each other.

The pendant lamp is available with a lamp body in bright chrome or black lacquer. The opal white lamp shades are available in acrylic glass or mouthblown glass. The Twin LED pendant lamp is operated with powerful LEDs and has a colour temperature of 2,700 Kelvin extra warm white, on request it is also available with 3,000 Kelvin warm white.
