

Knapstein JULI-T

Oberfläche

- latón
- níquel
- negro

Technical details

País de la Fabricación	Alemania
fabricante	Knapstein
diseñador	Knapstein
protección	IP20
Volumen de suministro	LED
entrada de tensión	110 - 240 Volt
Proyección en cm	75
material	latón
Atenuación	control por movimientos
Potencia en vatios	10 W
LED	incluyendo
Índice de reproducción cromática	>90
El flujo luminoso en lm	1.280
Temperatura de color en grados Kelvin	2.700 extra blanco cálido
longitud del brazo	37 cm
Dimensiones del soporte de la lámpara	longitud 20, anchura 15 cm
reemplazo de la bombilla:	en el fabricante / en la fabrica
Dimensions	H 50 cm

Descripción

The lamp arm of the Knapstein JULI-T table lamp has a projection of 75 cm and can be tilted. The lamp can be also tilted at will by means of a ball-and-socket joint at the lamp base. The table lamp can be switched and continuously dimmed by gesture control. To dim the light, the hand is held under the light source in the lamp arm until the desired light intensity is reached. The sensor for gesture control is located in the lower area of the plexiglass cover of the LED. The light can be switched on or off with a wiping hand movement. To dim the light, the hand is held below or above the sensor until the desired light intensity is reached. The last light intensity set is saved via the memory function and automatically selected again the next time the light is switched on. In the case of a mains failure, the lamp is automatically switched on if it was previously on. It remains switched off if it was also switched off before the mains failure. This function is suitable for use with switchable sockets.

The JULI-T from Knapstein is available in matt brass, black and matt nickel-plated surfaces. Its lamp base is 20 cm long and 15 cm wide. The integrated LED has a colour temperature of 2,700 Kelvin extra warm white.
