

Anthologie Quartett

Jahreszeiten Frost Pendant Lamp

Durchmesser in cm

- 70
- 50
- 90

Technical details

País de origen	 Alemania
Fabricante	Anthologie Quartett
Diseñador	Michael Topor
año	2003
Índice de protección / Protección IP	IP20
Contenido del paquete	Leuchtmittel/Bulb
entrada de tensión	110 - 240 Volt
material	acero, acero inoxidable, cristal, vidriol
Atenuación	Regulable en el sitio
Base / Portalámparas	B15d
El rendimiento del sistema	10 x 40 Watt (max.)

Descripción

The Anthologie Quartett Jahreszeiten Frost Pendant Lamp (Seasons Frost Pendant Lamp) is a chandelier with a combination of real candles and electric lamps. This Jahreszeiten lamp features small, hand-cut crystal glasses and polished stainless steel leaves as design elements. The structure made of steel is supplied in a chrome finish as standard. On request, the surface is also offered in bronze brown, gold, silver or white. At the end of the supplied canopy is a 10 cm long S-hook. A 40 cm long S-hook is hooked into this to suspend the lamp from the ceiling. The suspension cannot be shortened by the user. Other lengths for the included 40 cm long S-hook are also available on request.

The Jahreszeiten Frost Pendant lamp is offered in three sizes: with a diameter of 50 cm, 70 cm or 90 cm. The diameter of the lamps is approx. 50 cm, 70 cm or 90 cm respectively. Depending on the size, the crystal glasses and leaves are distributed in different arrangements on the steel structure.

In the 18th century, the Montgolfier brothers caused a sensation with the first flight in a hot air balloon. Thus, lamps with a semicircular shape in the lower segment were created at that time. The chandelier series Jahreszeiten is inspired by this Montgolfier style, which gave the chandelier its bulbous shape in its lower third. The symmetrical arrangement of the electric arms and forged candle holders give the lamp a modern design language. From the collection, further chandeliers with different crystal sizes and partly with different foliage made of patinated brass or polished stainless steel are offered.

Note: The use of retrofit sockets (B15d) allows the use of state-of-the-art light sources (halogen lamp, LED) in the future. In terms of sustainability, the lamp can therefore shine in its light for many years to come.
