- aluminium

Technical details

Pays de fabrication	 Italie
Fabricant	Luceplan
Créateur	Alberto Meda, Paolo Rizzatto
année	1985
Indice de protection / Indice IP	IP20
Contenu de la livraison	Leuchtmittel/Bulb
aptitude de tension	110 - 240 Volt
matériel	aluminium, nylon
Socle / Douille	GY6.35
commutabilité	sur la tête de lampe
Puissance (max. Watt)	10 Watt
longueur du bras	80 + 30 cm
Pied de lampe dimensions	15 cm
tête de luminaire masse	10 cm
répartition de la lumière	directement

Description

The Luceplan Berenice Terra floor lamp is equipped with two mobile light arms, which can be freely rotated and swiveled. This lamp is offered in different surfaces and with different reflector colours. The reflectors in yellow, sage green, rose or satin white are made of glass, the reflectors in aluminum, brass and black are made of metal. The light is emitted mainly directly, depending on where the light arm is rotated. Only a small portion of the light is directed into the room for the variants with glass reflector through the reflector.

There is an on / off switch on the light head. Since the current is directed through the lighting rods to the light head, no cable in the lighting rods are seen. The light can be operated with halogen lamps or LEDs. The lamp was designed in 1985 by Alberto Meda & Paolo Rizzatto.
