### Description

The Licht im Raum Ocular Spot 1 Serie 100 is the more light-gathering of two ceiling radiators with a rectangular ceiling shade. The traversable lens is 100 mm in diameter and so larger than the lens of the Ocular Spot 1. The light can also be used as a wall spotlight. The lamp body of stainless steel is offered in polished or mat nickel plated.

The light emitted is bundled through the glass lens and directed precisely to where it is desired. The LED lamp can be dimmed on site and has a radiation angle of 70 degrees. The lamp has a rotating and tilting joint, so that the lamp head can be aligned at will.
