## Description

The Marset Scantling S is a table lamp with a light arm made of oak wood and a light rod made of lacquered metal. Thanks to movable joints, both the lamp arm and the lamp shade can be re-aligned again and again. The technical precision in the manufacture of the lamp ensures that neither counterweights nor springs are required to maintain each set position of the lamp. The on/off switch is integrated into the rear of the lamp shade. The cable is largely routed inside the lamp arm and the lamp rod. The name of the Scantling S table lamp refers to an old unit of measurement for wood or stone.
