

Vistosi

Bolle SP 35

Oberfläche

- transparent
- blanc

Version

- E27
- LED

Technical details

| | |
|---|--|
| Pays de fabrication |  Italie |
| Fabricant | Vistosi |
| Créateur | Barbara Maggiolo |
| année | 2003 |
| Indice de protection / Indice IP | IP20 |
| Contenu de la livraison | Leuchtmittel/Bulb |
| aptitude de tension | 110 - 240 Volt |
| Diamètre en cm | 35 |
| matériel | cristal verre, métal |
| longueur de câble | 200 cm |
| réglage de la hauteur | hauteur déterminée |
| atténuation | dimmerable sur place |
| Dimensions | H 34 cm Ø 35 cm |

Description

The Vistosi Bolle SP 35 pendant lamp has a lamp shade made of crystal glass. The characteristic texture of this series is created by the Balaton technique: air bubbles are enclosed in the glass during processing. The resulting effect multiplies the reflections on the surface of the sphere. This lamp emits the light into the room and also directly downwards.

The Bolle SP 35 is available in crystal transparent and white. The metal parts are satin nickel-plated. This pendant lamp is available in two versions: as an E27 or as an LED lamp. The E27 lamp can also be operated with LED retrofits. The LED lamp has an integrated LED with a colour temperature of 2,700 Kelvin warm white and can be dimmed on site with a trailing edge phase dimmer. On request, the LED lamp is also available with a colour temperature of 3,000 Kelvin warm white and 0-10 Volt dimmable. The cables can be shortened if necessary. With the three ceiling hooks supplied, the pendant lamp can also be mounted independently of the power outlet.
