## Description

The Serien Lighting Reflex2 Ceiling M200 emits its light onto a reflector with a prismatic surface, which is located inside the ceiling light. Thus, the light is reflected into the room absolutely glare-free. The reflector is available in matt white, gold, silver or white. Depending on the reflector colour, the light creates a different mood.

The Reflex2 Ceiling M200 has a colour temperature of 2,700 Kelvin extra warm white. On request, the ceiling lamp is also available with 3,000 Kelvin warm white or with Tunable White technology. With Tunable White technology, the light can be controlled from incandescent warm to cool white. On request, the Reflex2 ceiling light is also available DALI, 0-10 volt dimmable or with Casambi module.
