Technical details

Land van fabricage	 Italië
fabrikant	Luceplan
ontwerper	Alberto Meda, Paolo Rizzatto
jaar	1985
bescherming	IP20
Omvang van de levering	Leuchtmittel/Bulb
voltage geschiktheid	110 - 240 Volt
materiaal	aluminium, nylon
base/versie	GY6.35
schakelbaarheid	op armatuur hoofd
Vermogen (max. Watt)	10 Watt
armlengte	80 + 30 cm
kandelaar Dimensions	15 cm
lampkop massa	10 cm
lichtverdeling	direct

Omschrijving

The Luceplan Berenice Terra floor lamp is equipped with two mobile light arms, which can be freely rotated and swiveled. This lamp is offered in different surfaces and with different reflector colours. The reflectors in yellow, sage green, rose or satin white are made of glass, the reflectors in aluminum, brass and black are made of metal. The light is emitted mainly directly, depending on where the light arm is rotated. Only a small portion of the light is directed into the room for the variants with glass reflector through the reflector.

There is an on / off switch on the light head. Since the current is directed through the lighting rods to the light head, no cable in the lighting rods are seen. The light can be operated with halogen lamps or LEDs. The lamp was designed in 1985 by Alberto Meda & Paolo Rizzatto.
