Omschrijving

The Ingo Maurer Holonzki is a wall lamp completely fabricated in handwork in a complex process. Thus each lamp is unique and carries an individual handwriting in the end. The materials used for the Holonzki are a glass hologram and metal. The hologram shows a virtual bulb seeming to float inside the room. This is a nice optical illusion created by the Holonzki. Being amazing in its effect the Ingo Maurer Holonzki does not only enthuse freaks of technics.
