

# Marset

## Theia M

### Oberfläche

- zwart
- wit

### Technical details

Land van fabricage	 Spanje
fabrikant	Marset
ontwerper	Mathias Hahn
jaar	2016
bescherming	IP20
Omvang van de levering	LED
voltage geschiktheid	230 - 240 Volt
materiaal	aluminium, metaal, methacrylaat
kabel kleur	zwart
kabellengte	150 cm
dimmen	Touch Dimmer op de lampkop
Wattage	11,3 W
LED	inclusief
Kleurweergave-index	90
Lichtstroom in lm	1.019
Kleurtemperatuur in Kelvin	2.700 extra warm wit
Schaduw diameter	32 cm
kandelaar Dimensions	30 cm
Dimensions	H 44 cm

### Omschrijving

The Marset Theia M table lamp has a lamp shade consisting of two hemispheres. One hemisphere is made of lacquered metal and is white inside. It is fixed vertically, the other horizontally, so that they partly overlap. The horizontal hemisphere is made of thermoformed smoked glass methacrylate. An LED is integrated in the centre of the shade, which emits its light onto the white inside of the vertical hemisphere. From there, the light is reflected directly into the room without glare and also through the horizontal, transparent hemisphere. The table lamp can be turned around its own axis and readjusted at any time with a handle on the light rod: either to emit light as a reading lamp or to create indirect lighting. The vertically mounted hemisphere is available in white or black from the outside. The painted metal rod and base are also in the matching surface. The Theia M can be switched and dimmed by pressing a push button dimmer on the lamp head.
