## Omschrijving

The light of the Serien Lighting Reflex2 Ceiling M600 is emitted onto a prismatic reflector surface inside the ceiling light. This reflects the light absolutely glare-free into the room. The reflector is available in matt white, gold, silver or white. Each reflector provides a different lighting effect for this ceiling light.

A powerful LED with a colour temperature of 2700 Kelvin extra warm white is included as illuminant. The Reflex2 Ceiling M600 is also available with 3,000 Kelvin warm white or with Tunable White technology. The lamp with Tunable White technology can emit light from incandescent warm to cool white. The ceiling lamp is also available DALI, 0-10 Volt dimmable or with Casambi module on request.
