Omschrijving

The Knapstein LINN-128 is a pendant lamp with a length of 128 cm. Its total height can be adjusted between 106 cm and 188 cm by stoppers on the ropes. The lamp must not be adjusted when switched on. For height adjustment, the shells are pushed in at the bottom of the stoppers, then the lamp can be pushed or pulled to the desired height. If necessary, the wire ropes can be shortened on site.

The LINN-128 from Knapstein emits its light upwards and downwards. The uplight and the downlight can be switched and dimmed separately by gesture control. The sensor area for gesture control is located centrally at the top and bottom of the lamp. The light is switched on or off with a wiping hand movement in the sensor area. Holding the hand in the sensor area for a longer period of time allows the lamp to be dimmed continuously. The last light intensity setting is saved by the memory function and is automatically adjusted the next time the light is switched on.

The LINN-128 is available in the versions matt nickel and black. In addition to this pendant lamp, the collection also includes LINN pendant lamps with a length of 68 cm or 161 cm and with height adjustment by lifting or pulling the lamp itself (LINN-L). The LINN is also available in other lengths or finishes on request.
