

Serien Lighting

Poppy Spare Bimetallic Lamellae

Technical details

Land van herkomst	 Duitsland
Fabrikant	Serien Lighting
materiaal	bimetaal
Dimensions	L 12 cm

Omschrijving

The Serien Lighting Poppy replacement bimetal lamellae can be used for all lamps from the Poppy family. This replacement part has the shape of a metal flower. After switching on the light, the metal flower opens due to the heat of the light bulb. The lamellae can be replaced without tools.
