Omschrijving

With 2500 lumens and a colour rendering index of RA>90, the Holtkötter Supernova S-DTW leaves nothing to be desired in terms of the light emitted. The lamp head, which can be rotated and swivelled in all directions, allows the light to be individually directed. The light can be infinitely adjusted using a centrally mounted touch dimmer. When dimmed, the light colour of the integrated LED changes to a warmer tone (from 2,850 Kelvin warm white to 2,200 Kelvin warm white) thanks to dim-to-warm technology. The last light setting used is saved using the memory function. The height is adjusted using an integrated, invisible lift mechanism. The Holtkötter Supernova S-DTW is available in matt aluminium, anodised brass, platinum, white, bronze and black.
