Opis

The Catellani & Smith Luce d'Oro T is a flexible table lamp, because both the reflector and the reflector disc are attached to flexible arms, which can be variably adjusted. The overall height of the lamp is therefore a maximum of 85 cm and the reflector can always be readjusted to the disc. The following surfaces are available for the reflector disc: Silver leaf, copper or gold leaf. Depending on the choice of surface, the elements have different surfaces between disc and flexible arm or between reflector and flexible arm. In the silver leaf version, these elements are as nickel-plated as the base, in the other two versions, the base and elements are made of brass.

The Luce d'Oro T is supplied with an exchangeable LED. This can be operated via an on/off switch. The base is square with a length and width of 21 cm. The reflector disc has a diameter of 30 cm.
