Opis

The Arturo Alvarez Gea GE04 pendant lamp consists of a basic structure made of metal and a lamp shade made of Simetech stretched over it. Simetech is a handmade material from a stainless steel mesh with silicone coating. It is a highly malleable material suitable for the production of large lamps with different textures and light capacities. The material Simetech creates light-dark zones, which generate a pleasant atmosphere with warm light. The Gea GE04 pendant lamp is offered here in yellow as a discontinued model. The lamp has an E27 socket which can be operated with LEDs (retrofits). It has a diameter of 19 cm and a height of 45 cm. The cable can be shortened if required.
